

HNPM
Corporation

We as HNPM develop and manufacture the smallest and most precise micro annular gear pumps in the world. With our products and our consulting services, we are a much sought-after solution provider in minimum quantity dosing and metering technology for laboratory and analysis technology, mechanical and plant engineering as well as in the chemical and pharmaceutical industries. Our customers mostly have challenging high-tech projects and issues, so we are both specialists in exciting application fields and generalists in microfluidic system solutions.

Our American subsidiary HNPM Corporation with regional sales in North America as part of our continuous growth sells our products in the USA and Canada. To consequently continue this successful development of sales and strengthen the team at our location in Schaumburg (IL) we are looking for:

Application Engineer

Key Responsibilities

- Support customer applications in life science, mechanical engineering, chemistry and pharma
- Technical consulting on pumps and dosing technology
- System installation and trouble shooting at customer site
- Working with distributors, OEM's and end users
- Participation in domestic and international trade shows
- Travel in the USA and Canada as required

Key Experience and Qualifications

- Bachelor's degree in Engineering or similar
- Analytical and systematic way of working
- Hands on and team-orientated mentality
- Communication skills, flexibility as well as strong customer and service orientation

We provide

- Exciting working environment in a growing company
- Attractive salary and variable bonus system
- Structured induction and extensive training program, partially in Germany
- Varied tasks with a large amount of personal responsibility
- Motivated and committed team

Please send your complete and informative application (curriculum vitae, references, salary expectations and earliest starting date) preferably by e-mail in PDF format to Mrs. Yvonne Eilers, yvonne.eilers@hnp-mikrosysteme.de.
